

Group meeting BIOS30:

Time : William

Notes: Karina

Meeting 1: Time = 21 min

- All people attended the meeting on time
- **Spatial reasoning test** (William) code is completed: add more questions, maybe improve the answer layout, maybe increase the difficulty of the questions
- **Maths ability test** (Siham) code is also completed: maybe increase the time of the test
- **ANS test** (Naoto) is completed: some problem with button
- **Memory test** (Karina) is written, but it demands the troubleshooting: connect the whole code => will run without a pause; write the code for the total time of the test and the total of correct answers, run\_memory\_1 etc. at the separate box to run the test nonstop
- Validating the results
